Stock is limited, order by **February 23th** for best selection

No cancellations after this date.

Bareroot trees will be sold in bundles only. If you want fewer trees we recommend purchasing potted.

Not seeing something on the list? Contact the SWCD and we may be able to order it for you.

Order and pay for orders in our online store at www.freebornswcd.org

Not Ordering Online? You can still mail in your order with your payment.

Make checks payable to: **Freeborn County SWCD**

The SWCD sells good quality trees, but offers no guarantee of survival or availability of items ordered.

We will contact you when the orders are ready to be picked up, generally around the 3rd or 4th week of April.

*Plant Packs will be available for pick up mid-May.

Evergreen

<p><u>Arborvitae, American:</u> <i>Thuja occidentalis</i> - Height of 40 – 50'. Also known as Northern White Cedar. Pyramid shaped tree with flat, soft green scale-like needles. Excellent windbreak tree for home sites. Susceptible to drying out in dry, cold winters so water well.</p>	<p><u>Cedar, Eastern Red:</u> <i>Juniperus virginiana</i> - Height of 40 – 50'. Native to IA. Sharp green scale-like needles. Good for wildlife. Tolerant of most light and heavy soil conditions.</p>	<p><u>Pine, Red:</u> <i>Pinus resinosa</i> – Height of 50 - 80'. Also known as Norway Pine. Long needled, pyramid shaped tree. Prefers well-drained, sandy soils. Popular Christmas tree species. Needs up to 20' spacing to avoid overcrowding of lower branches.</p>	<p><u>Pine, White:</u> <i>Pinus strobus</i> – Height of 80-100'. Fast growing, tallest conifer species in MN. Needles in groups of 5. Pyramid shaped when young, broadening with age. Prefers sandy or silt loam soils, but will tolerate a wide range. Needs at least 20' spacing to avoid overcrowding of lower branches.</p>
<p><u>Spruce, Black Hills:</u> <i>Picea glauca</i> var. <i>densata</i> – Height of 40 – 50'. Native to Black Hills, SD. Strain of white spruce. Slow growing, conical tree with dark green needles. Hardy & more drought resistant than White Spruce.</p>	<p><u>Spruce, Meyer:</u> <i>Picea meyeri</i> - grows to mature heights of 40-100'. Being used to replace Colorado Spruce because of it being disease prone. Grows 13-24" per year. Can handle droughty conditions and likes the sun.</p>	<p><u>Spruce, Norway:</u> <i>Picea abies</i> – Height of 80 – 100+'. Native to Europe. Pyramidal tree with drooping branches. Fastest growing, and tallest species of spruce.</p>	<p><u>Tamarack:</u> <i>Larix laricina</i> – Height of 50-75'. This is a deciduous conifer it loses its needles every fall. It can tolerate a wide range of soil conditions but grows most commonly on wet to moist organic soils. Very shade intolerant.</p>

Shrubs

<p><u>Arrowwood:</u> <i>Viburnum dentatum</i> – Height of 6-10'. Native of eastern & midwestern U.S. Produces cream colored flowers followed by small blue or purple fruits. Favors moist but well-drained soils of varying pH. Good food source for wildlife.</p>	<p><u>Cranberry, American Highbush:</u> <i>Viburnum trilobum</i> – Height 10 – 16'. Produces white flowers & red edible fruit, with excellent fall color. When planted as a hedge, makes a good snow fence in winter. Good for wildlife. Tolerates a variety of soils.</p>	<p><u>Dogwood, Redosier:</u> <i>Cornus sericea</i> – Height of 8-10'. Fast growing native shrub. This shrub has bright red stems and produces clusters of white fruit. Good for wildlife. Prefers moist sites.</p>	<p><u>Hazelnut, American:</u> <i>Corylus americana</i> - Height of 3-10'. Shade tolerant. Produces edible nuts eaten by birds and mammals. Variable fall color. Can reproduce by suckering.</p>
<p><u>Lilac, Common Purple:</u> <i>Syringa vulgaris</i> - Height of 10-15'. Large, round-headed shrub. Profuse bloomer, with purple flowers in the spring. Prefers well-drained soils and full sun for best flowering effect.</p>	<p><u>Nannyberry:</u> <i>Virburnum lentago</i> - Height of 10-20'. Fast growing. Glossy leaves with cream flowers followed by blue-black berries. Tolerates a wide range of soils and pH. Attractive for shiny foliage and red fall color.</p>		

Deciduous Trees

<p><u>Birch, Paper:</u> <i>Betula papyrifera</i> - Height of 50 - 70'. Hardy native and fairly rapid growing with shallow roots. Somewhat borer resistant, but not pollution tolerant. Easy to transplant and casts light shade.</p>	<p><u>Crabapple, Red Splendor:</u> <i>Malus "red splendor"</i> – Height and spread of 15-25'. Leaves are green or reddish, flowers are white or pink followed by fruits ¼" to 1" in diameter. Full sun. Quality food source for wildlife.</p>	<p><u>Maple, Red:</u> <i>Acer rubrum</i> – Height 40-70'. Native to MN. Saw toothed lobed leaves. Shade tolerant, grows in very wet to dry conditions, moderately fast growing. Leaves can turn red, yellow or orange in fall.</p>	<p><u>Maple, Sugar:</u> <i>Acer saccharum</i> –Height of 60-80' Produces dense, oval crown and bright fall colors ranging from yellow to orangish red. Slow-growing, needs well-drained, loamy soils. Not tolerant of wet soils. Shade tolerant.</p>
<p><u>Oak, Bur:</u> <i>Quercus macrocarpa</i> – Height of 70-80+'. Has simple lobed leaves and produces acorns. Good for wildlife. Tolerates a variety of soil types. Long-lived but slow growing initially.</p>	<p><u>Oak, Red (Northern):</u> <i>Quercus rubra</i> – Height of 60-80+'. Simple lobed, bristle-tipped leaves. Red or brown fall leaf color. Good for wildlife. Prefers deep, rich soils, intolerant of drier alkaline soils. Long-lived & fastest growing oak.</p>	<p><u>Serviceberry, (Juneberry):</u> <i>Amelanchier alnifolia</i>- small tree 6-15 ft. Expands by suckers. Prefers loam - sandy loam with high organic matter. Limited drought tolerance. Will not sustain in ponded conditions. Full/partial sun.</p>	<p><u>Walnut, Black:</u> <i>Juglans nigra</i> – Height of 50-60+'. Native to IA. Fast growing. Leaves are pinnately compound and produce a hard-shelled nut. Good for wildlife. Prefers moist well-drained soils.</p>

Willow, Hybrid: *Salix matsudana/alba* - Large tree up to 75'. Single stemmed tree good for windbreaks. Avoid planting near other willows and in areas where uncontrolled spread is possible.

Other

Tree Tube: A plastic, vented tube which protects hardwood trees and some shrub seedlings from animal browse, mower and spray damage. Stakes are not provided; any 5' stake will work along with zip ties.

Fertilizer Packet: A small packet filled with a pre-measured amount of fertilizer that is placed alongside the seedling at time of planting. The packet slowly releases nutrients to help new seedlings get an extra boost.

Plant Packs

Monarch Pack: A mix of native species to benefit Monarch caterpillars and butterflies. Species include Showy Milkweed, Meadow Blazing Star, Showy Goldenrod, Sky Blue Aster, Purple Prairie Clover, and Side Oats Grama.

Pollinator Pack: A mix of Spring, Summer, and Fall blossoming species in a variety of colors to provide food for a range of pollinators year-round. Species include Yarrow, Prairie Coreopsis, Pale Purple Coneflower, Sky Blue Aster, Hoary Vervain, and Little Bluestem.

Tree Mat: A three foot square permeable woven plastic sheet that greatly reduces weed competition, reduces maintenance time, and increases soil moisture. Each tree mat comes with 5 tree mat staples.
